PROJECTS

campusment.com

website

📅 April 2016

The proposed system was a website through which user can easily find their requirements. The system was database driven web-based solution that can provide easy and faster access and find the information related student/candidate, employer and educators. This system provides a complete solution to student/candidate for recruitment. It allows to create an online student record for company. Company can access the student information securely online as per requirement, at any time from anywhere.
