## Project Undertaken

### Student Management System.

April - 2017

We all know that while School/ college Admission, using Pen and paper and anyone can access it easily. The paper can be tear or damage. Because of some natural disaster we could lose the documents which are important. So we get an idea from this. Our purpose to reduce the paper work.

### Unmanned Aerial Ground and Water Vehicle (ARCUV)

2020

The invention is generally focused on unmanned aerial ground and water vehicle, which is associated with the surveillance practices, the invention is more particularly an autonomous and remotely controlled unmanned vehicle, which is more capable in aerial, terrestrial locomotive and water surface surveillance.
