Aggregate-83.60%

COURSES AND WORKSHOPS:

Workshop on Cloud Computing.
Workshop on Agile Methodology.

PROJECTS:

Inventory Management System for Canteen
Software project
October 2018

➢ *The proposed system was developed to manage the inventory system of college canteen. This system was database driven java-based application that can provide easy and faster access and find the information related to stock of the canteen. System stores the details of the inventory, stock maintenance and update the inventory based on retrieval of stock. The purpose of project was to build the application program to reduce manual work for managing inventory.*

Automated Fuel station using finger print*.*
Hardware project
May 2019

➢ *Nowadays, we have seen tragedies happening in Petrol Pump premises that is due to the mobile phones remaining on while getting petrol filled. So to avoid that we have come with the solution of installing the API in mobile phones under the guidance of Government which will vibrate the phones and compel the people to switch off their phones, when they will come under the premises of Petrol Pump.*

➢ *Due to Mobile Phones remaining off, some of the challenges may come like some of the people do transactions with phone. To avoid that we have introduced payment with Fingerprint Scanner that is linked with their adhaar card and card payment will also be there.*

➢ *After this whole thing, to reduce man power and customer satisfaction, the customer himself/herself must fill their tank by entering the amount on the petrol pump and petrol will get dispensed accurately.*

CAREER OBJECTIVES:

To continue my career with an organization, so that will utilize my Knowledge and skills to benefit mutual growth and success.

TECHNICAL SKILLS:

C++, Core Java, Mysql, HTML 5, CSS, Java Script

LANGUAGES SPOKEN:

English

Hindi

Kashmiri

Marathi

HOBBIES:

Dancing

Singing

Cooking

PERSONAL SKILLS:

Leadership.

Communication.

Quick Learner.

Hard Working.

ACHIEVEMENTS:

Certificate of Participation in Singing Competition.

School and College level Certificates.

Managed Departmental Events.

Certificate of Barclays tech innovation Challenge.

Agile methodology Certificate.
